PROFESSIONAL EXPERIENCE

Full Stack Developer

Corbin Technology Solutions Pvt Ltd | Sept 2023 - Present

- Successfully developed robust mobile applications using Flutter at Corbin Technology Solutions Pvt Ltd, enhancing user engagement and retention.
- Built dynamic, responsive, and scalable websites with React and Next.js, leading to increased traffic and improved user experience.
- Designed efficient and reliable APIs with Node.js, significantly improving data handling and system performance.
- Contributed to key projects, including an eCommerce platform and a Learning Management System, demonstrating versatility and expertise in different domains.
- Played a crucial role in project planning and management, ensuring timely delivery and alignment with business objectives while excelling in cross-functional collaboration to deliver cohesive and integrated solutions.

PERSONAL PROJECTS

- Sales and Distribution Management System** - Developed as a final year project, this software system helps product-based companies manage sales and distribution across multiple shops. Created detailed plans and models to enable tracking of sales, generating shop statistics, and managing shop employees.
- Amazon Clone** - Designed and implemented a basic Amazon clone as a practice project, featuring user authentication, product management, shopping cart, purchase processes, and admin uploads. Utilized APIs to build a functional e-commerce platform.
- Tours and Travels Static Website** - Developed a fully responsive static website for a tours and travels company, including features for listing tour packages and safaris, with a contact form for bookings. Completed as a freelance assignment with an emphasis on user experience.
- Chemical Company Static Website** - Created a responsive static website for a chemical company, showcasing their product range and company information. Designed a professional interface to effectively present the company's offerings.
